Mohammad Yasin Arafat

App developer

Self-motivated and skilled Android App Developer with over 3 years of experience delivering high-quality mobile solutions. Proficient in Java, Kotlin, PHP, MySQL, SQLite, Firebase, AWS, and Google Cloud. Successfully completed 50+ freelance projects on Fiverr with a focus on client satisfaction and timely delivery. Experienced in publishing and maintaining 4 live apps on the Google Play Store and providing paid app promotion services.

EXPERIENCES

Freelance Android App Developer Fiverr – [Remote]

01.06.2024 -
Successfully completed over 50 orders for clients worldwide, ensuring top-quality app development and maintenance.
Developed customized Android applications using Java and Kotlin, tailored to meet specific client requirements.
Integrated backend systems using PHP and MySQL, enhancing app functionality.
Utilized Firebase for real-time database management, push notifications, and authentication.

Collaborated with clients to provide paid app promotion services, increasing app visibility and downloads.

Projects Live Apps on Google Play Store

1. live cricket score app: A live cricket score app provides real-time updates on cricket matches, including scores, ball-by-ball commentary, player stats, match schedules, and results. It keeps cricket enthusiasts updated with live notifications and detailed insights, ensuring they never miss any action from their favorite teams and tournaments.

2. Islamic app :"An all-in-one Islamic app providing prayer times, Qibla direction, Quran with translations, daily duas, Islamic calendar, and reminders to enhance your spiritual journey."

3. A real-time currency converter app : A real-time currency converter app provides up-to-the-minute exchange rates for various currencies, enabling users to quickly and accurately convert amounts between currencies. It typically features a user-friendly interface, customizable currency lists, historical data, offline mode, and integration with financial APIs to ensure precision. Perfect for travelers, traders, and anyone dealing with foreign currencies

SKILLS

• Other Skills: App
Deployment, Paid App
Promotion, UI/UX
Design, Android project
bug fix
